

## Physician office visits

## Non-physician office visits

## Physician hospital visits

## Non-physician hospital visits

A complex diagram illustrating the intersection of various factors. At the center is a point where several lines and ellipses overlap. The lines are labeled with terms: 'hospital' (blue), 'health' (green), 'chronic' (green), 'error' (red), 'excuse' (red), 'gender' (teal), and 'insurance' (red). There are three overlapping ellipses: a red one, a green one, and a black one. The diagram suggests a central point of convergence for these different concepts.
